SUBJECT INDEX

4-*O*-(2-Acetamido-2-deoxy-β-D-glucopyranosyl) derivatives of muramic acid δ-lactam structures, synthesis and conformational analysis, 131

O-Acetyl group, determination of the position of the, in a β-(1 → 4)-mannan (acemannan) from *Aloe barbardensis* Miller, 317

O-Acetyl group in xanthan gum, location of a second, by the reductive-cleavage method, 321

Assay of alginate lyases, preparation of end-labelled fluorescent polyguluronate and polymannuronate for the, 237

Borate ions, calorimetric study of the interactions of D-glucose, D-fructose, sucrose, and poly(vinyl alcohol) with, 279

Calorimetric study of the interactions of D-glucose, D-fructose, sucrose, and poly(vinyl alcohol) with borate ions, 279

Carbohydrate interaction with monovalent ions. The effects of Li^+, Na^+, K^+, NH_4^+, Rb^+, and Cs^+ on the solid state and solution structures of D-glucono-1,5-lactone and D-gluconic acid, 25

Carboxylic acids, synthesis of glucuronides of α,β-unsaturated, 81

Cellulose acetate butyrate, ^{13}C NMR determination of the distribution of two ester substituents in, 285

Celluloses from *Valonia* and tunicin, second-derivative FTIR spectra of native, 47

Chemical synthesis of the trisaccharide and the terminal di- and mono-saccharide units of the major serologically active glycolipid from *Mycobacterium leprae*, 99

^{13}C NMR determination of the distribution of two ester substituents in cellulose acetate butyrate, 285

Complex formation between polyols and rare earth cations: the crystal structure of galactitol · $2PrCl_3 \cdot 14H_2O$, 1

Conformational analysis and synthesis of muramic acid δ-lactam structures and their 4-*O*-(2-acetamido-2-deoxy-β-D-glucopyranosyl) derivatives, 131

Copper(II) hydroxide, formation of complexes with *rac-trans*-cyclohexane-1,2-diol, erythritol, and methyl α-D-mannopyranoside of, 9

Cord factors, "mirror coryno", synthesis, 117

COSY and double-quantum filtered gradient-selective COSY experiments, application to 2-deoxy-D-*arabino*-hexose of gradient-selective, 267

Crystal and molecular structure of β-D-fructofuranosyl α-D-xylopyranoside hemihydrate, 63

Crystal and molecular structure of 2,3,4-tri-*O*-acetyl-1,5-anhydro-6,7-dideoxy-7-*S*-methyl-6-nitro-7-thio-L-*glycero*-L-*gluco*-heptitol, 273

Crystallographic structure determination of methyl α-D-galactopyranoside 2,6-bis(sodium sulfate) · $2H_2O$, synthesis and X-ray, 89

Crystallographic structures of methyl 2-*O*-methyl-α-D-glucopyranoside and methyl 4,6-*O*-(*S*)-benzylidene-2-*O*-methyl-α-D-galactopyranoside, the X-ray, 261

Cycloinulo-oligosaccharides, complexing with metal ions, 245

Cyclomaltoheptaose (β-cyclodextrin) and its methylated derivatives, inclusion complexes with the main components of the pheromone of the olive fruit fly, 37

Deacylation on the glucosyl moiety of octa-*O*-acetylsucrose by enzymic hydrolysis, selective, 327

2-Deoxy-D-*arabino*-hexose, application of gradient-selective COSY and double-quantum filtered gradient-selective COSY experiments to, 267

4-Deoxy-4-fluoro-D-galactopyranosyl derivatives, an improved synthesis of, 295

6-*O*-Desulfation of polysaccharide sulfates with *N*,*O*-bis(trimethylsilyl)acetamide, specific, 209

Dextran, an investigation of the structure of periodate-oxidised, 189
Distribution of two ester substituents in cellulose acetate butyrate, ^{13}C NMR determination of the, 285

Encephalartos friderici-guilielmi, studies of the structure of the gum exudate of, 217
End-labelled fluorescent polyguluronate and polymannuronate for the assay of alginate lyases, 237
Ethylenediamine and copper(II) hydroxide, formation of complexes with *rac-trans*- cyclohexane-1,2-diol, erythritol, and methyl α-D-mannopyranoside of, 9

Flax fibre, isolation and partial characterisation of the non-cellulosic polysaccharides of, 227
4-Fluoro-D-galactopyranosyl, 4-deoxy-, derivatives, an improved synthesis of, 295
β-D-Fructofuranosyl α-D-fructofuranosyl α-D-xylopyranoside hemihydrate, crystal and molecular structure of, 63
FTIR spectra of native celluloses from *Valonia* and tunicin, second-derivative, 47
α-D-Fucopyranose, 1,2,3,4-tetra-*O*-acetyl-, synthesis from D-galactose of, 291

Galactitol · $2PrCl_3$ · $14H_2O$, the crystal structure of, 1
α-D-Galactopyranoside 2,6-bis(sodium sulfate) · $2H_2O$, synthesis and X-ray crystallographic structure determination of methyl, 89
D-Galactopyranosyl, 4-deoxy-4-fluoro-, derivatives, an improved synthesis of, 295
D-Galactose, synthesis of 1,2,3,4-tetra-*O*-acetyl-α-D-fucopyranose from, 291
D-Glucono-1,5-lactone and D-gluconic acid, carbohydrate interaction with monovalent ions. The effects of Li^+, Na^+, K^+, NH_4^+, Rb^+, and Cs^+ on the solid state and solution structures of, 25
β-D-Glucopyranoside, phenyl *O*-(tetra-*O*-acetyl-β-D-galactopyranosyl)-(1 → 3)-4,6-di-*O*-acetyl-2-deoxy-2-phthalimido-1-thio-, a convenient synthesis of lacto-*N*-biose I [β-D-Gal*p*-(1 → 3)-β-D-Glc*p*NAc] linked oligosaccharides from, 165
D-Glucose, D-fructose, sucrose, and poly(vinyl alcohol), calorimetric study of the interactions with borate ions, 279
Glucuronides of α,β-unsaturated carboxylic acids, synthesis of, 81
Glycolipid from *Mycobacterium leprae*, a new approach to the chemical synthesis of the trisaccharide and the terminal di- and mono-saccharide units of the major serologically active, 99
Glycopeptidolipid of *Mycobacterium avium* serotype 4, iodonium ion-assisted synthesis of a haptenic tetrasaccharide fragment corresponding to the inner cell-wall, 153
Gradient-selective COSY and double-quantum filtered gradient-selective COSY experiments, application to 2-deoxy-D-*arabino*-hexose, 267
Gum exudate of *Encephalartos friderici-guilielmi*, studies of the structure of the, 217

Heparin, structure elucidation of a novel acidic tetrasaccharide and hexasaccharide derived from chemically modified, 249
Heptitol, crystal and molecular structure of 2,3,4-tri-*O*-acetyl-1,5-anhydro-6,7-dideoxy-7-*S*-methyl-6-nitro-7-thio-L-*glycero*-L-*gluco*-, 273
4-Homopyrazofurin and an acyclic analogue, 71

Inclusion complexes of cyclomaltoheptaose (β-cyclodextrin) and its methylated derivatives with the main components of the pheromone of the olive fruit fly, 37
Inulo-oligosaccharides, complexing with metal ions of cyclo-, 245
Iodonium ion-assisted synthesis of a haptenic tetrasaccharide fragment corresponding to the inner cell-wall glycopeptidolipid of *Mycobacterium avium* serotype 4, 153

Lacto-*N*-biose I [β-D-Gal*p*-(1 → 3)-β-D-Glc*p*NAc] linked oligosaccharides from phenyl *O*-(tetra-*O*-acetyl-β-D-galacto-pyranosyl)-(1 → 3)-4,6-di-*O*-acetyl-2-deoxy-2-phthalimido-1-thio-β-D-glucopyranoside, a convenient synthesis of, 165
Lipopolysaccharide from *Xanthomonas campestris* NCPPB 45, structure of the O-specific polysaccharide of the, 309
Lipopolysaccharide from *Yersinia kristensii* O:25.35, structure of the O-specific polysaccharide of the, 201
Lysosphingolipids of human brain (plasmalopsychosines A and B), synthesis, 301

β-(1 → 4)-Mannan (acemannan), determination of the position of the *O*-acetyl group in a, from *Aloe barbardensis* Miller, 317
D-Mannitol, 2,5-anhydro-1-*O*-(*p*-tolylsulfonyl)-, crystal structure of, 55
Methyl 2-*O*-methyl-α-D-glucopyranoside and methyl 4,6-*O*-(*S*)-benzylidene-2-*O*-methyl-α-D- galactopyranoside, X-ray crystallographic structures of, 261

Methyl α-D-galactopyranoside 2,6-bis(sodium sulfate)·$2H_2O$, synthesis and X-ray crystallographic structure determination of, 89
Mirror coryno cord factors, synthesis, 117
Molecular and crystal structure of 2,3,4-tri-*O*-acetyl-1,5-anhydro-6,7-dideoxy-7-*S*-methyl-6-nitro-7-thio-L-*glycero*-L-*gluco*-heptitol, 273
Monovalent ions. The effects of Li^+, Na^+, K^+, NH_4^+, Rb^+, and Cs^+ on the solid state and solution structures of D-glucono-1,5-lactone and D-gluconic acid, carbohydrate interaction with, 25
Muramic acid δ-lactam structures and their 4-*O*-(2-acetamido-2-deoxy-β-D-glucopyranosyl) derivatives, synthesis and conformational analysis, 131

Non-cellulosic polysaccharides of flax fibre, isolation and partial characterisation, 227

Octa-*O*-acetylsucrose, selective formation of 2,1′,3′,4′,6′-penta-*O*-acetylsucrose by enzymic hydrolysis of, 327

Periodate-oxidised dextran, an investigation of the structure of, 189
Pheromone of the olive fruit fly, inclusion complexes of cyclomaltoheptaose (β-cyclodextrin) and its methylated derivatives with the main components of the, 37
Plasmalopsychosines A and B, two novel lysosphingolipids found in human brain, synthesis, 301
Polyguluronate and polymannuronate, preparation of end-labelled fluorescent, for the assay of alginate lyases, 237
Polyols (*rac-trans*-cyclohexane-1,2-diol, erythritol, and methyl α-D-mannopyranoside), formation of complexes of ethylenediamine and copper(II) hydroxide with, 9
Polysaccharide gum exudate of *Encephalartos friderici-guilielmi*, studies of the structure of the, 217
Polysaccharide of *Salmonella arizonae* O45, structure of the O-specific, 177
Polysaccharide sulfates, specific 6-*O*-desulfation with *N*,*O*-bis(trimethylsilyl)acetamide, 209
Polysaccharide of *Xanthomonas campestris* NCPPB 45 lipopolysaccharide, structure of the O-specific, 309
Polysaccharide of the lipopolysaccharide from *Yersinia kristensenii* O:25.35, structure of the O-specific, 201
Polysaccharides of flax fibre, isolation and partial characterisation of non-cellulosic, 227
Pyrazofurin, 4-homo-, and an acyclic analogue, 71

Rare earth cations, complex formation with polyols, 1
Reductive-cleavage method, location of a second *O*-acetyl group in xanthan gum by the, 321
Regioselective desulfation of polysaccharide sulfates with *N*,*O*-bis(trimethylsilyl)acetamide, 209

Salmonella arizonae O45, structure of the O-specific polysaccharide of, 177
O-Specific polysaccharide of *Salmonella arizonae* O45, structure of, 177
Structure of β-D-fructofuranosyl α-D-xylopyranoside hemihydrate, crystal and molecular, 63
Structure of periodate-oxidised dextran, an investigation of the, 189
Sucrose, selective formation of 2,1′,3′,4′6′-penta-*O*-acetyl-, by enzymic hydrolysis of octa-*O*-acetylsucrose, 327

Tetrasaccharide fragment corresponding to the inner cell-wall glycopeptidolipid of *Mycobacterium avium* serotype 4, iodonium ion-assisted synthesis of a haptenic, 153
1,2,3,4-Tetra-*O*-acetyl-α-D-fucopyranose, synthesis from D-galactose of, 291
Trisaccharide and the terminal di- and monosaccharide units of the major serologically active glycolipid from *Mycobacterium leprae*, a new approach to the chemical synthesis of the, 99

α,β-Unsaturated carboxylic acids, synthesis of glucuronides of, 81

Valonia and tunicin, spectra of native celluloses from, 47

Xanthan gum, location of a second *O*-acetyl group in, by the reductive-cleavage method, 321
Xanthomonas campestris NCPPB 45 lipopolysaccharide, structure of the O-specific polysaccharide of, 309
X-ray crystallographic structures of methyl 2-*O*-methyl-α-D-glucopyranoside and methyl 4,6-*O*-(*S*)-benzylidene-2-*O*-methyl-α-D-galactopyranoside, 261

Yersinia kristensenii O:25.35, structure of the O-specific polysaccharide of the lipopolysaccharide from, 201
